TRINAY CLINICAL GLAUCOMA REPORT

ID: ff80d014-bc29-474c-adba-8cf4e27903bc

AI-Assisted Optic Nerve, CDR & Retinal Vessel Screening

Date: 07 Oct 2026

PATIENT DEMOGRAPHICS

Patient Name:	**Walk-in Patient**	Age / Gender:	**55 yrs / Other**	Phone:	**N/A**
Patient ID:	**PX-4518**	Examined Eye:	**Right Eye**	Operator:	**Clinical Operator**

DIAGNOSTIC VERDICT: NORMAL / LOW RISK

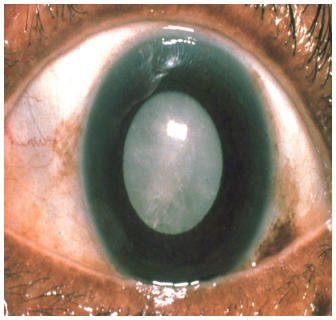

Glaucoma Prob: 0.0%

Optic nerve and CDR within expected physiologic bounds. Routine follow-up.

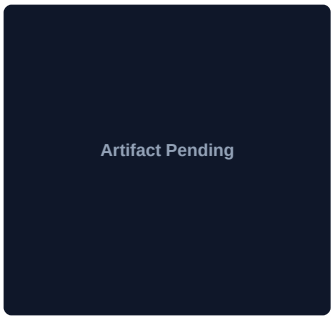

QUANTITATIVE MORPHOLOGICAL & CDR MEASUREMENTS

Vertical CDR:	**N/A**	(Threshold: < 0.65)	Horizontal CDR:	**N/A**	(Threshold: < 0.65)
Area CDR:	**N/A**	(Ratio: Cup / Disc Area)	Cup Inside Ratio:	**N/A**	(Anatomical concentricity)
Optic Disc Area:	**N/A**	(Disc Detection: PASS)	Optic Cup Area:	**N/A**	(Cup Detection: PASS)

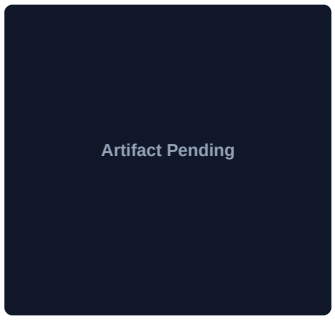

VISUAL EVIDENCE & OPTICAL LANDMARKS

1. Original Fundus

2. Optic Disc/Cup

3. Retinal Vessels

4. Grad-CAM / XAI

RECOMMENDED CLINICAL ACTION & REFERRAL TIMELINE

Routine preventive care: Structural optic nerve parameters within physiologic range. Continue annual visual acuity and eye health evaluations.

DOCTOR'S CLINICAL TRIAGE SUMMARY (FOR ATTENDING CLINICIAN)

Anterior segment screening demonstrates clinically significant lens opacification in the crystalline lens within the pupillary aperture. Pupillary margins are intact without visible coloboma or synechiae. Visual axis compromise suspected. Recommendation: Comprehensive slit-lamp biomicroscopy and visual acuity testing with dilated fundus examination to assess cataract density (nuclear/cortical/posterior subcapsular) and determine surgical/medical candidacy.

PATIENT COUNSELING & EXPLANATION (SIMPLE & UNDERSTANDABLE)

A clouding (cataract) was observed in the lens of your eye that can blur or dim your vision, like looking through a foggy window. This is very common and treatable. Please consult an eye specialist for an in-person eye exam to evaluate your vision and discuss treatment options.

CLINICAL PRECAUTIONS & ACTIONABLE GUIDELINES (FOR PATIENT & CAREGIVER)

- Schedule routine annual comprehensive dilated eye exams to maintain your healthy optic nerve baseline.
- Stay well-hydrated throughout the day and engage in regular cardiovascular exercise (walking, swimming).
- Protect eyes from blunt trauma with appropriate protective eyewear during sports or home maintenance.

CLINICAL SPECIALIST VERIFICATION & ATTESTATION

Reviewing Specialist: _____ Signature & Date: _____

Clinical Registration / License: _____ *(Licensed Ophthalmologist / Retina Specialist)*

REGULATORY & MEDICAL DISCLAIMER

TRINAY Glaucoma Screening is an AI-assisted decision support system for triage and early detection. This report does not constitute a definitive medical diagnosis. All findings must be clinically correlated by a licensed ophthalmologist.
